

## **For Immediate Release**

### **Tadiran Telecom Added to DOD Approved List with Full PBX1 Certification**

*Tadiran's Family of Coral IPx Products Allow DOD Organizations to Deploy Mission-Critical Communication Systems with MLPP*

**Port Washington, N.Y. – March 19, 2007** – Tadiran Telecom®, a leading global IP business telephone and communications supplier, today announced that its family of Coral® IP PBX products has passed the U.S. Department of Defense (DOD) Joint Interoperability Test Command (JITC) testing and certification. The PBX-1 CPE solution also achieved Information Assurance (IA) Accreditation from the DISN Security Accreditation Working Group (DSAWG) and Interoperability Certification from the Joint Staff of the DSN Voice Connection Approval Office. These certifications confirm that Tadiran's IP Communications products comply with the interoperability, reliability and resiliency requirements of the DOD's multi-vendor testing environment. Tadiran's IP PBX products have now been fully tested and approved by the DOD's stringent requirements for multi-level precedence preemption (MLPP).

"For more than 35 years, federal, state and municipal government organizations have relied on Tadiran Telecom to deliver military-grade communications with a rock-solid reputation for quality and superior performance," said David Sopko, VP and General Manager of Tadiran's Government Division. "The U.S. government has always been an important market to us, and these certifications cannot be understated. It is the result of a company-wide commitment to meet all DOD requirements for communications, and we are extremely pleased and proud of this accomplishment."

Tadiran's award-winning family of Coral IPx products are based on open standards, allowing businesses and organizations of all sizes to move to the world of IP-based communications in stages, at the speed that suits their needs. The Coral IPx family includes a breadth of products that combine leading edge Voice over IP (VoIP) technology at the best total cost of ownership, backed by superb voice quality, easy installation and maintenance, secured communications, and a wide choice of user devices to support tele-workers, corporate and branch offices, and road warriors. With deployments in 41 countries, the Coral IPx products can easily adapt to different companies, different networks and different countries.

Sopko continued, "This achievement underscores our continued and unshakable commitment to provide the highest level of IP communications reliability, scalability and networking capabilities to federal, state and municipal government organizations."
