

Tadiran Telecom completes a 3 million dollar network for Kazakhmys Copper Corporation in Kazakhstan

Petach Tikva, Israel – April 18, 2007 - Tadiran Telecom, a leading global IP business telephone and communications supplier, today announced the completion of a communication network for Kazakhmys Corporation, the world's tenth largest refined copper producer employing 66,000 workers. Tadiran won this project against fierce competition from Nortel, Avaya, Siemens, Nokia, and Alcatel and has been deploying this intricate solution, comprising 40 systems that support the corporate center and remote mines, over a period of four years. The financial value of the project is about 3 million dollars.

Vladimir Khan, Chief of IT and Telecommunications, Kazakhmys Copper Corporation, said that “Kazakhmys chose Tadiran Telecom for its high product reliability and quality, as well as for its ability to supply a complex solution meeting the unique requirements of the mining industry. During the four years of this project we have received outstanding service from Tadiran’s business partner in Kazakhstan - ADVANTEK SYSTEMS, and the Coral systems have been operating under extreme conditions, in an outdoors environment with minimum downtime. Following the success of this project we are looking into the possibility of adding Tadiran’s IP solutions.”

“We were able to carry out this complicated project due to our deep understanding of the Kazakhstan market and culture through our business partner there.” said **Zeev Aviv, VP Sales & Marketing, Tadiran Telecom**. “We have had great success in providing communications solutions to customers in different forms of mining (coal, metal alloys, diamonds etc.) mainly in the Russian and CIS market, China and India.”

The entire network of over 40 systems is made up entirely of Tadiran’s Coral systems. A hub of networked Coral FlexiCom 6000 systems provides communications to the corporate center and other facilities using QSIG. The remote mines are connected to the central hub via satellite links. Tadiran's solution for the mining industry includes the rugged design of the system

cabinets, which obviates the need for special casing, and the special telephones with international mining standards certification.

About Kazakhmys Copper Corporation

Kazakhmys is an international company operating in Kazakhstan, Germany and the UK and is active in mining, processing, smelting, refining and sale of copper and copper products, including cathodes and rods. As by-products, the company, together with its subsidiaries in Kazakhstan and Germany, also processes, refines and sells zinc, gold and silver. Kazakhmys Copper Corporation is the tenth largest refined copper producer and the tenth largest mined copper producer in the world based on 2004 production.
