

Tadiran Telecom Announces Coral® SeaBeam

New VoIP softphone provides essential office communications services to Coral users on the go

Petach Tikva, Israel – July 1, 2008 – Tadiran Telecom®, a leading global IP business telephone and communications supplier, today announced the availability of its newest application, the Coral® SeaBeam, an advanced SIP softphone that integrates with Tadiran's Coral IPx/FlexiCom and the Coral Sea Softswitch.

The Coral SeaBeam is an advanced SIP softphone that supports voice, video, presence, and much more. Coral SeaBeam runs on Microsoft Windows and functions as a terminal on both Coral IPx and FlexiCom systems as well as on Coral Sea Softswitch systems.

Easy to install and cost effective, the Coral SeaBeam allows the user to make/receive calls, initiate/participate in conference calls, display/view availability information, and activate a variety of other telephony features all from the computer.

The user-friendly interface, which includes feature keys, LCD-like display panel and a message waiting indicator, makes the SeaBeam easy to learn and easy to use.

Coral SeaBeam supports open SIP standards for both voice and video over IP and turns the host computer into an instant IP communications device.

The SeaBeam joins the impressive list of applications that Tadiran Telecom offers their customers.
